The True Next Generation
High Performance Zirconia

- Anterior Translucency (>48%)
- Maximum Strength (>1250 MPa*)
- Eliminates Graying on Lighter Shades

Beyond Plus™ zirconia is in a class of its own. B&D Dental Technologies offers a uniquely universal zirconia that delivers on the promise of beauty and strength. Beyond Plus™ is more than a true replacement for lithium disilicate such as **e.max®. It is stronger with equal or better aesthetics.

- Dentists no longer have to compromise strength for beauty. Their choice has been simplified.
- Labs benefit from a dense material that allows them to reproduce a sharp margin while still milling the 98mm zirconia disc easily (due to deliberate pre-sintering parameters).

In addition to the ultimate blend of translucency and strength, Beyond Plus™ was developed to work with CHROMA™ color liquid v.6.1 to provide consistent shading for optimal aesthetics.

*1100 MPa: up to 14 mm, 1250 MPa: over 16 mm  **Not a trademark of B&D Dental

**Beyond Plus™** is THE BEST ZIRCONIA ON THE MARKET. It looks as good as any anterior zirconia, better than *e.max®, and is STRONG enough for large posterior bridges.”
